

City of Alcoa Public Works & Engineering Department **CIVIL ENGINEER**

The City of Alcoa Public Works Department is seeking a career-minded individual for the position of **Civil Engineer**. The work assignments of this position are professional, technical, and management in nature associated with municipal public works engineering and construction. The successful applicant will be expected to become proficient in all aspects of municipal civil engineering including transportation, stormwater, water treatment & distribution, wastewater collection, and solid waste management with emphasis on utility plans review, utility design, and water/waste water project management. Applicants for this position shall have graduated from an accredited college or university with a degree in civil or environmental engineering and successfully passed the Fundamentals of Engineering (FE) exam or shall be licensed as a Professional Engineer (PE). Strong interpersonal, communications, and customer services skills are required. Experience with AutoCAD Civil 3D, surveying, instrumentation and/or computer modeling is a plus. Preference may be given to applicants with water and wastewater experience. Salary DOQ/DOE.

Interested persons must complete an on line application and submit a resume along with salary requirements. A complete job description along with application can be found at www.cityofalcoa-tn.gov. Applications and resumes should be submitted by 4:30 p.m., Friday, October 26, 2018.

The City of Alcoa is an Equal Opportunity / Affirmative Action employer & Title VI compliant. **No phone calls please.**
