

MasTec is a national infrastructure construction company, serving a broad range of industries within the energy and communication sectors. MasTec is a publicly traded, Fortune 500, certified Minority-Controlled Company, with a workforce of over 23,000 and a footprint extending throughout North America, parts of Latin America and the Caribbean. Over the past 80 years, MasTec has executed some of the largest infrastructure construction projects in North America. We engineer, procure, construct and maintain the infrastructure enabling a wide variety of communications, electric power, natural gas utilities to operate their business.

Communication and its infrastructure are constantly evolving, and MasTec is not only keeping pace with that evolution, we're driving it. We specialize in services for wireline and wireless communications companies in advanced fiber optic, copper, small cell, microwave, and satellite networks.

As one of the nation's leading providers of electric utility construction, maintenance, and engineering services. MasTec enables the efficient and reliable generation, transmission, and distribution of electricity to homes and businesses across the country.

MasTec provides a full range of infrastructure construction services to the oil and gas industry. Our experienced construction crews stay at the forefront of software, equipment and training developments to ensure the most effective design and construction of distribution pipeline systems.

When natural disasters and severe weather strike, MasTec's nationwide emergency response crews and equipment are on call 24/7/365 to ensure that your customer's power systems are restored safely and as efficiently as possible.

Our deep industry expertise, extensive resources and our constant pursuit of innovation allows us to successfully deliver our clients' services – from the generation source to their customer's.
